

DYM-050

Dynamic linear solenoid

The DYNAMAG is a linear solenoid for electrical short-stroke applications in mechanical engineering.

- ✓ **Electric short-stroke movements straight forward:** High forces with minimal energy consumption, without overheating.
- ✓ **Fast processes made easy:** High number of cycles through electromagnetic drive concept.
- ✓ **Effortless integration:** Single cable for power supply, control signals and end position sensors.

Force	up to 35N in both directions
Stroke	10 / 15 / 20 / 25mm
Cycles/minute	up to 300
Degree of protection	IP65

Made in Switzerland
